Revenue recognition system: test report

Date: 2026-11-05 - Code version: c4313cb-dirty

DRAFT: the run passes, but the report cannot be signed yet.

- 13 case(s) use expected values M1 has not confirmed (drafted by the developers).
- 3 accounting decision(s) are not signed off.
- 1 case(s) are not built yet.

Result

Cases run: 19, failed: 0

Amounts compared: 8000, outside tolerance: 0

Largest difference: 0.01

Pass rule: Every schedule and journal amount within 0.01 of the expected value, and every obligation's schedule total exactly equal to its allocation (plan §11.1).

"Zero variance" here means no amount is outside the 0.01 tolerance. It does not mean every difference is 0.00: Excel holds unrounded amounts and the system holds cents, so differences up to the tolerance are expected (plan §11.4).

Per case

Case	Level	Expected from	Result	Compared	Max var.	Over 0.01
U01_ratable_monthly_12m	Unit	Developer draft	PASS	25	0.00	0
U02_ratable_daily_mid_month	Unit	Developer draft	PASS	27	0.00	0
U03_point_in_time	Unit	Developer draft	PASS	3	0.00	0
B01_worked_example	Bundle	Developer draft	PASS	33	0.00	0
B02_three_line_discount	Bundle	Developer draft	PASS	75	0.00	0
B03_setup_fee	Bundle	Developer draft	PASS	25	0.00	0
E01_renewal	Events	Developer draft	PASS	100	0.00	0
E02_cancellation_credit_note	Events	Developer draft	PASS	37	0.00	0
E03_upgrade	Events	Developer draft	PASS	68	0.00	0
J01_invoice_in_advance	Journals	Developer draft	PASS	50	0.00	0
J02_credit_note_unrecognised	Journals	Developer draft	PASS	51	0.00	0
J03_recognition_before_invoice	Journals	Developer draft	PASS	32	0.00	0
C01_close_and_late_invoice	Close	Developer draft	PASS	39	0.00	0
X01_revrec_model_final	Excel	Workbook	PASS	80	0.01	0
X02_revrec_mock_data	Excel	Workbook	PASS	557	0.01	0
L01_load_50k	Load	-	Not built			
G_bundles_s2	Generated	Generator	PASS	1187	0.00	0
G_events_s3	Generated	Generator	PASS	1859	0.00	0
G_full_s4	Generated	Generator	PASS	2286	0.00	0
G_single_s1	Generated	Generator	PASS	1466	0.00	0

How the differences spread

Difference	Amounts
0	7502
up to 0.005	403
above 0.005, below 0.01	91
exactly 0.01	4
over 0.01	0

4 amount(s) sit exactly at 0.01. They pass only because the rule says "within 0.01", read as including 0.01. M1 should confirm that reading.

Largest differences

Decisions waiting for sign-off

- D2: Rounding is ROUND_HALF_UP to 2 dp
- D3: The Excel method PROPORTIONAL_PERFORMANCE maps to POINT_IN_TIME with partial deliveries: tranches are recognised on delivery dates; any undelivered remainder is recognised on the completion date
- D8: Prospective upgrade: SSP basis for an old ratable obligation that continues is SSP × remaining service days ÷ total service days; satisfied point-in-time obligations are excluded from reallocation
